# Success Story

## Dairy Conveyor Corp. streamlines drawing management with CADDi for faster workflows

As a high mix low volume manufacturer, Dairy Conveyor Corporation struggled with managing over 400,000 engineering drawings in their large catalogue. This led to inefficiencies in retrieving and verifying critical data. With CADDi, they streamlined their workflow, enabling engineers to find drawings instantly, reduce errors, and accelerate project timelines.

The seamless implementation required no disruption, improving efficiency and profitability. CADDi's solution transformed their document management, ensuring accuracy, speed, and a competitive edge in the industry.
