

DCC Automation sees major gains after a year of using CADDi

DCC Automation adopted CADDi in September 2024. After a year of using it, we're proud to report that they've unlocked even greater productivity gains and savings.

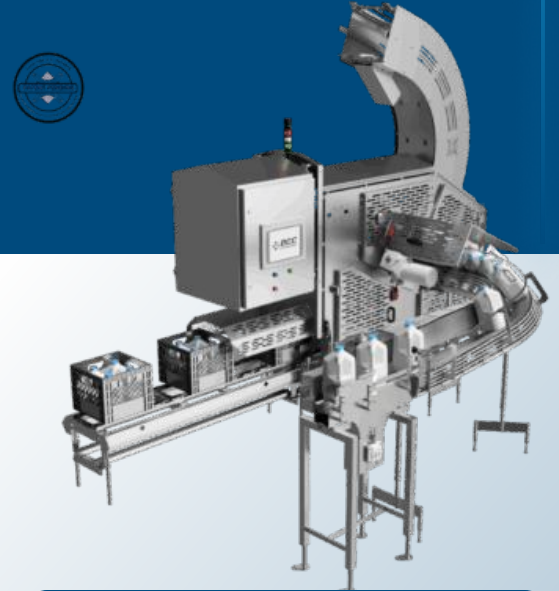

Over 40% cost reduction compared to 2024

By using CADDi drawing analysis and reporting, DCC was able to group procurement requests and minimize material usage. Compared to 2024, their total spend was reduced by 49% in 2025.

600 working hours saved on procurement tasks

CADDi reduced the time procurement tasks took by 98%, taking tasks that took minutes down to a few seconds. The total workload for the procurement team shrank by 600 hours, leaving time for cost optimization exercises and other proactive projects.
